This type of door is also known as a sliding garage door, an overhead garage door, or an "up and over". B&D's range of sectional doors is called Panelift, which are extremely durable and secure. Since most sectional doors don't actually lock when they're closed, enhance the safety of your door with B&D's AUTO LOCK™ – an innovative, heavy-duty locking bolt that automatically engages every time the door is closed. If you're considering a purchase, read on for some must-know facts and features of our sectional doors before making a decision. 1. The vertical opening-and-closing action of a sectional garage door saves space on your driveway. You can park cars directly in front of the garage without impacting the operation of the garage door. 2. Sectional garage doors are made to accommodate a range of garage sizes and specifications for both single and double openings. For tips on measuring your space, see Everything You Need to Know About Garage Door Sizing . 3. B&D; sectional garage doors consist of a series of rigid panels with pinch-free finger-safe hinges, carried on tracks to be stored horizontally across the garage ceiling when open. A must if you care for curious children! 4. Garage ceiling space is limited with the use of a sectional garage door compared to a roller door, meaning the area can't be used for storage or lighting. 5. A sectional door is strong and extremely secure. They're manufactured with reliable, durable panels, ensuring the door is secure when it's opened and closed. 6. With a range of security upgrades available on all B&D; sectional garage doors, such as AUTO LOCK™, Wireless Safety Beams, and Smart Phone Control, it's never been simpler to secure your garage. 7. Design options for sectional garage doors are plentiful. Garage doors are made to measure to suit your individual style and needs, letting you achieve modern or traditional looks using the panels as a canvas. For more inspiration, explore B&D's Inspiration Gallery . 8. Sectional garage doors can often accommodate windows where other types can't. Windows on a garage door allow extra light and create a fantastic design element. Take a look at our blog post on adding window inserts for ideas. 9. Insulation is available on all B&D; sectional garage doors an excellent feature that keeps your garage cooler in summer and warmer in winter. This is ideal if you use your garage for more than just car

storage, such as a home gym, office, or chill-out zone for the kids. 10. Manual garage door operation is possible, but most homeowners opt for an automatic opener. Browse B&D's range of sectional door openers here . An opener is especially beneficial for large and double sectional garage doors because of their heavier weight. 11. Maintenance of a sectional garage door is simple, but regular servicing is strongly recommended and required to maintain your 10 year warranty . A B&D; specialist garage door technician should service all moving parts regularly to ensure your sectional door is operating correctly. It's recommended to have your sectional door serviced once in the first 12 months, and every two years thereafter. You can book a service to keep your door in top condition. The B&D; Difference Why Choose B&D; Our Range B&D; Panelift While sectional garage doors can be made from a variety of materials, B&D; prefers the strength and durability of Australian steel for all Panelift and Panelift Icon doors. Each panel is made with sturdy, reinforced COLORBOND steel and tested to withstand Australia's varied climate. Every B&D; sectional door features a pinch-free, finger-safe design (invented by B&D;) to prevent fingers from being caught between the hinges. Panelift Icon garage doors features 360-perimetre seals to keep dust, leaves and debris out. All B&D; sectional doors feature custom-designed guides for naturally smooth, quiet operation. B&D; sectional doors feature customisable spring options, selected based on your exact needs and requirements to ensure the door operates how it should. Panelift Icon comes fully equipped with AUTO LOCK [™] – an advanced automatic locking mechanism that engages a heavy-duty bolt to ensure your door is locked shut, every time. Smooth Track, twin-wheel systems also ensure even smoother, quieter performance. If you are building your new home from scratch, B&D's Designer Series offers a range of architecturally inspired garage door designs that are as beautiful as they are functional. Options include eco-friendly composite materials, non-stick graffiti-proof timber, perforated panels, semi-precious metals and matched profiles. The possibilities are endless! B&D's 10-year Total Confidence Warranty provides peace of mind that your door will look and operate the way it should, year after year. B&D; Panelift come in a variety of additional options to suit extreme weather conditions: BAL-Maze [™] is Australia's only CSIRO-tested BAL-rated door system offering maximum protection against bush fire. Choose the Storm Shield option if you live in a storm prone area. The extra strength of high tensile galvanised steel and the patented Track-Lock Technology, engages the door during a high wind event. Windpanel is designed to withstand wind speeds of up to 317 kph for use in all cyclone-affected regions throughout Australia. Looking for more information?
