Or perhaps you're looking at upgrading your existing door? Here at B&D;, we have dealers and installers throughout Brisbane, Gold Coast, the Sunshine Coast and greater Queensland. Our garage door buying guide is full of useful information on the different door types and styles, as well as important security features to look for. Explore our range Explore our range Explore our range Types of garage doors All of our B&D; garage doors are Australian-made and available in two types: roller doors and sectional doors. Roller garage doors Sectional garage doors Tilt doors Roller garage doors provide an effective and affordable way to secure garages, laneways and sheds. Their design is space-saving, allowing the ceiling to be used for additional lighting or storage. These doors operate by rolling upwards into a compact roll at the top of the door frame. This feature is particularly beneficial as it enables vehicles to park close to the door, optimising the use of the driveway area. These doors are available with the option of manual or automatic operation. The inclusion of a sturdy key lock system in roller garage doors enhances security by preventing unauthorised access. They can also be built to withstand high wind conditions, making them ideal for cyclone-prone areas. Constructed from multiple interconnected panels, sectional garage doors look like a solid door. They are customisable to fit various garage shapes and sizes. Contrasting with roller doors, sectional doors move along metal tracks attached to the ceiling during the opening and closing process. Available in a variety of styles and colours, these doors are favoured in residential homes for their contemporary look, durability, and practicality. With sectional garage doors, the era of manually lifting and unlocking garage doors is a thing of the past. These doors are commonly bought with an automatic opener, enhancing security. The unique feature of B&D;'s automatic locking system eliminates the need for manual locks, ensuring that access is restricted to those with a remote control. Tilt doors are less prevalent in the market due to their safety and security concerns, which is why B&D; does not produce or install them. These doors consist of a single, solid piece and have visible springs on each side. The weight of the door places significant strain on the springs and balance mechanism during operation. Worn springs can unexpectedly break, causing the door to forcefully close, posing a risk to people, pets, and vehicles.

Garage door safety and security At B&D, prioritising security and safety in our garage door installations is of utmost importance. We strive to equip our customers with the highest level of protection. Here's a guide to essential safety features you should consider when purchasing a new garage door.

Smart phone operation Control and monitor your garage door using a smartphone or tablet with our smart door openers. The B&D Smart Phone app allows for connectivity with multiple devices and alerts you if the door is left open, operated, or blocked.

Smart door solutions Smart door solutions Smart door solutions Warranty The importance of a comprehensive warranty for your garage door cannot be overstated. It guarantees the door's functionality and durability. B&D's garage doors and openers are designed to function together seamlessly, which is why we offer an industry-leading 10-year Total Confidence Warranty *, ensuring optimal performance and dependability. *Terms and conditions apply.

Garage Door Warranty Garage Door Warranty Garage Door Warranty **AUTO LOCK™** A closed garage door doesn't necessarily mean it's secure. The AUTO LOCK™ feature is engineered to prevent burglars from lifting an unlocked door. It engages a heavy-duty bolt automatically upon receiving a signal from the remote, eliminating the need for keys. AUTO LOCK™ AUTO LOCK™ AUTO LOCK™

Automatic Reverse and Backdrive B&D's automated garage doors are integrated with an automatic reversal system in the motor. This system detects resistance or blockages. The Automatic Reverse function is designed to stop the door from closing on obstructions like people or belongings, whereas the Automatic Backdrive activates the motor to reverse if an attempt is made to force the door open.

Openers and Remotes Openers and Remotes Openers and Remotes **Infrared motion detection** Alongside the auto-reverse function, our wireless safety beams are vital for safeguarding children, pets, vehicles, and valuables. Placed just above the ground at the garage door's base, these infrared beams stop the door from closing if they detect something in its path. The door will reverse immediately if the beam is interrupted, reducing hazards and preventing accidents.

Openers and Remotes Openers and Remotes Openers and Remotes **Choosing a garage door style** Garage doors are available in a wide range of materials, designs, colours, and finishes, ranging from luxury designer doors to classic styles. They constitute approximately 45% of a house's exterior look and are just as critical in defining your home's curb appeal as the main entrance, windows, or external siding. Hence, choosing a high-quality garage door is crucial. For those looking to match their garage doors with the existing colour palette of their home and other metal elements, COLORBOND garage doors offer a smooth integration. On the other hand, Knotwood offers a woodgrain finish that replicates the charm and warm texture of real wood, giving your home a rustic and natural appearance.

Feeling overwhelmed about where to begin? Let us ease your decision-making process. We're here to collaborate with you to understand your specific needs and assist in designing a bespoke garage door that enhances your home's architecture.
