The power packed compact design, which is 30% smaller than Axess Pro 1101, means an easier installation in a variety of limited space applications. It comes with the Logic Control System featuring LCD screen, customisable menu system, service indicator, 24-hour clock and storing 511 TrioCode transmitter codes. It easily integrates additional inputs. The Magnetic Automatic Limit Position System (M-ALPS) allows for easy set up and maintaining accurate limits. The Axess Pro 1505 is compatible with wireless PE Beams, which require less installation time. Read more about axess pro 1505 Read more about axess pro 1505 Read more about axess pro 1505 Axess Pro 3100 Commercial door openers The Axess Pro Series 3100 range provides an innovative suite of features for the demanding world of industrial shutter automation. With a

selection of input and output power variations, and a scalable suite of control and safety options, this combination of strength and smarts is an evolutionary step forward. It can be controlled either by a simple manual console, or the sophisticated logic control system with LCD screen, integrated time clock and TrioCode 128 technology. [Read more about axess pro 3100](#) [Read more about axess pro 3100](#) [Read more about axess pro 3100](#) Automate your new or existing commercial garage door Commercial garage doors are heavy and cumbersome. Adding a motor to your garage door improves safety and security of your staff and your premises as you no longer need to worry about having to manually open and close your heavy commercial garage door. Don't risk injury and ensure your business is securely locked up when you're not there. The perfect blend of security and convenience. Why automate? Not only does automating your commercial garage door make it easier to use, it also adds an extra layer of safety and security to your business: Improves safety: In-built automatic reversing smarts reverses the door if it senses an obstruction is in the way ensuring you no longer need to worry about yourself or your staff getting injured lifting and lowering the door. Increases security: Prevent unwanted entry with automatic back drive which forces the door back down if it senses unwanted entry. Added convenience: By ensuring you no longer need to worry about your or your staff leaving the car to open or close your garage door late at night or in the middle of a storm. Explore our commercial doors range Explore our commercial doors range Explore our commercial doors range Which opener is right for me? All of our roller door openers are stress tested to ensure they open and close your garage door quickly and quietly, year after year, no matter the size of the door. All of our roller door openers include a soft start and soft stop feature that minimises the stress on the opener, while also helping to reduce noise when opening or closing the door. Both roller door motors require regular servicing at varying intervals to maximise the life of the motor, and thanks to built-in logics, your roller door motor will automatically alert you when a service is due. Roll-A-Pro is perfect for Roll-A-Door and Rollmasta Power Drive is perfect for Roll-A-Door Neo If you have a Roll-A-Door or Rollmasta door, Roll-A-Pro should be your go-to. The more economical Roll-A-Pro has a slightly lower peak pulling force, supporting doors up to 15m² in size. The Roll-A-Pro comes with a 5-year/10,000 cycle warranty, suitable for lower use applications. Learn more about the Roll-A-Pro opener If you have the Roll-A-Door Neo , Power Drive is the perfect partner. Our Power Drive motor has a greater pulling force, making it suitable for doors up to 16.5m² in size. Power Drive is backed by a 7-year/20,000 cycle warranty. Learn more about the Power Drive opener B&D; commercial door openers keep your business safe and secure Why you should protect your business with a B&D; commercial opener. B&D;'s commercial door motors have been developed to offer the same safety, security, and speed benefits found in our residential garage door openers, along with quiet operation. However, this range is more powerful to easily manage opening and closing doors that are much wider, taller, and heavier, multiple times each day. More importantly, our commercial door openers include features that offer unique benefits in a commercial environment, such as programmable control panels that allow the motor to be integrated into other security networks. Most commercial door motors include as standard a stop and reverse function that reverses the direction of the door if it hits any obstruction, but in any high-traffic workplace you would want safety beams that – when the beam is broken – prevent the door from closing at all. And all B&D; commercial door openers support the use of up to three safety beams, offering a far higher level of safety, on top of some commercial door motors including an emergency stop button. All B&D; commercial door motors support the use of our Tri-Tran+ [™] transmitters, allowing you to provide multiple employees with a way to automatically open or close any roller doors, shutters, or sectional doors with a compatible opener installed. However, for businesses that close for a period of time, such as for a seasonal break at the end of the year, the vacation mode feature found on some of our commercial door openers is critical, allowing you to easily lock out all but one master transmitter until the end of the break.
