An automatic LED courtesy light illuminate your garage, which is ideal if you arrive home late or are often in the garage at night. Smart as can B&D; Smart as can B&D; Smart as can B&D; Safety as standard Automatic reverse prevents the garage door from closing on an obstruction, such as a child or pet while automatic backdrive immediately stops and reverses the door if it encounters an obstacle in its path. Safe as can B&D; Safe as can B&D; Safe as can B&D; Fast, powerful motor A reliable 500N motor works to automate residential roller doors quietly and effortlessly ensuring your garage door opens and closes quickly and seamlessly. Soft start and stop reduces stress on the door while ensuring quiet operation. Reliable as can B&D; Reliable as can B&D; Reliable as can B&D; Recommended door Roll-A-Door Established in 1956 and invented by B&D;, the Roll-A-Door was the first-ever roller door in Australia. After more than 60 years, it continues to set the standard as a safe, sturdy and durable roller door. It features B&D;'s own Nylofelt running strips on both sides of the door to ensure quiet operation, as well as unique 'brake press' technology, which ensures the door remains flat and looks great for years to come. Whether your home is contemporary or exudes old-world charm, the Roll-A-Door comes in an array of trendy COLORBOND colours, finishes and profiles to perfectly complement your façade. Roll A Door Roll A Door Roll A Door Rollmasta B&D;'s Rollmasta is a top-quality, cost-effective roller door solution for homes, sheds and commercial properties. Strong, secure and sleek, every Rollmasta door is made to measure to suit your exact needs and requirements, resulting in an affordable, durable door from a brand you can trust. Rollmasta

Rollmasta Rollmasta Warranty 10-year total confidence warranty Our garage doors and openers are designed and tested to work together, which means when bought together, you'll receive our 10-year Total Confidence Warranty. If purchased alone, the Roll-A-Pro comes with a five-year warranty (or 10,000 cycles). We know automating your garage can be tricky Whether you're after a brand-new door and opener or looking to automate your existing garage door, contact us to speak with a B&D; expert for a complimentary measure and quote. Your browser does not support HTML5 video. I called B&D; Garage Doors to ask about repairing my garage door opening problems, particularly in relation to my garage door motor, they answered all of my questions and the various options and arranged for a professional service tech. He arrived at my house the next day, did his best to correct the problem, however the same problem kept repeating over a number of days, he then installed a new motor under my seven year warranty, just so impressed at the service I have received from B&D.; Pete, Perth Workman spent time working on my ageing door motor, and then we made the decision to put in a new motor, which works so reliably and smoothly! Very happy with the promptness to my request for an appointment, and the workman's pleasant attitude and commitment. Ruth, Sydney I sent off an email request as our panel door would not open, to book an appointment for someone to come out. They called me back and talked through the options over the phone to try before they would send some one out. And they fixed the door. No cost. Took us five minutes in total to fix it. Loved the service. Thank you very much. Loretta B., Brisbane Motor and rail replaced, new AUTO LOCK [™] installed. Very professional job. On time job completed by time stated. Tom, Adelaide Very happy with the purchase of my b&d; roll a door. Great service from the first contact to the onsite quote and professional installation. Very quiet door and motor. Thoroughly recommend B&D.; Bruce S., Melbourne I called B&D; Garage Doors to ask about repairing my garage door opening problems, particularly in relation to my garage door motor, they answered all of my questions and the various options and arranged for a professional service tech. He arrived at my house the next day, did his best to correct the problem, however the same problem kept repeating over a number of days, he then installed a new motor under my seven year warranty, just so impressed at the service I have received from B&D.; Pete, Perth Workman spent time working on my ageing door motor, and then we made the decision to put in a new motor, which works so reliably and smoothly! garage door opens and closes. Safety Beams Safety Beams Safety Beams Recommended upgrade Entry Keypad B&D's external entry keypad allows you to enter the garage with just a pin, making it ideal for families with children as you won't need to give them a key or remote. Garage Entry & Access Garage Entry & Access B&D; garage doors keep your pet as safe as can B&D; The garage door is often the largest, heaviest moving part of a home, so consider the risks if it were to close on a family member, pet, car or bike. While all B&D; automatic garage door motors feature built-in auto-reverse functionality to stop the door from colliding with an object, Safety Beams are specially designed to prevent potential injury to people or damage to valuables. So you can keep Bee & Dee as safe as can B&D.; Play Got a question? Check out our frequently asked questions below. If you can't see the answer, give us a call on 13 62 63 and our friendly team can help you out. Why is my garage door opener beeping and flashing? The most common reason your opener starts to beep or flash is because it's due for scheduled maintenance. That's right, your garage door opener tells you when it's time for a service! Even your car isn't that smart. Click here to book a service. Watch our handy video tutorial below to eliminate any other alternatives. How do I select the right garage door opener? If you have a sectional garage door , head to this handy guide on sectional door automation. If you have a rolling garage door , use this handy guide on which roller door opener is right for you. If you have a Designer garage door , then we recommend using the Smart Pro garage door opener as our Designer Series doors are often heavy and need the additional strength and lifting power that the Smart Pro provides. How long does a garage door opener last? B&D; have a 7-year warranty or 20,000 lift and lower cycles (that's roughly seven to eight cycles a day) on all of our garage door openers, except when purchased with a genuine B&D; garage door, at which point we offer our market-leading 10-year total confidence warranty . My opener is running but door isn't moving? Your garage door opener is probably disconnected from your garage door. Follow the below video to reengage your garage door opener. If this doesn't work call B&D; and we can arrange for one of our friendly, qualified garage door technician to service and repair your opener. Reconnect a roller garage door Reconnect a sectional garage door Why won't my garage door open when I press the button? The most common reason a garage door remote or wall button stops working is because the batteries are low. Change the batteries and try again. If this doesn't work watch our quick video tutorial below. If you're still having trouble call B&D; and we can arrange for one of our friendly, qualified garage door technician to service and repair your opener. Should I service my garage door opener? B&D; recommends servicing your garage door and opener once in the first 12 months and every two years thereafter. Just like the engine in your car, your garage door opener is made up of a lot of moving parts and needs regular servicing to keep it in tip-top condition. Book a service or call us on 13 62 63 and our friendly team can book one in for you. Can I add a new B&D; opener to a different brand of garage door? No. B&D; garage doors and openers are designed and tested to be used together which is why we recommend that you install your new B&D; opener on a genuine B&D; garage door. How can garage door openers improve my home security? All B&D; openers have standard security features built in like Automatic Reverse and Automatic Backdrive. Automatic Reverse prevents the door from closing on any obstruction; as soon as the closing door encounters an obstacle in its path, the opener will immediately stop and reverse. Automatic Backdrive is designed to further prevent forced entry, with the opener driving back down if the door is being forced open. Automatic openers also remove the need for a fixed lock and handle, which is a common target among thieves. To level up your garage security again install a B&D; AUTO LOCK TM on your garage door. What is the automatic closing feature of garage door openers? The automatic closing feature of garage door openers allows you to set a timer for your garage door to automatically close after a certain amount of time, ensuring that your garage door is always closed and secure. What is rolling code technology, and why is it important for garage door openers? Rolling code technology is a security feature that changes the access code for your garage door opener every time you use it, preventing unauthorized access and reducing the risk of break-ins. Can I install a smart garage door opener myself, or do I need to hire a professional? B&D; always recommend paying a professional for garage door and opener installation. Garage doors are heavy and when mishandled can seriously damage property or injure those close by. To read more on this check out our article on DIY vs. professional installation .
