Entry & Access B&D; garage doors keep your pet as safe as can B&D; The garage door is often the largest, heaviest moving part of a home, so consider the risks if it were to close on a family member, pet, car or bike. While all B&D; automatic garage door motors feature built-in auto-reverse functionality to stop the door from colliding with an object, Safety Beams are specially designed to prevent potential injury to people or damage to valuables. So you can keep Bee & Dee as safe as can B&D.; Play Got a question? Check out our frequently asked questions below. If you can't see the answer, give us a call on 13 62 63 and our friendly team can help you out. Why is my garage door opener beeping and flashing? The most common reason your opener starts to beep or flash is because it's due for scheduled maintenance. That's right, your garage door opener tells you when it's time for a service! Even your car isn't that smart. Click here to book a service. Watch our handy video tutorial below to eliminate any other alternatives. How do I select the right garage door opener? If you have a sectional garage door , head to this handy guide on sectional door automation. If you have a rolling garage door , use this handy guide on which roller door opener is right for you. If you have a Designer garage door , then we recommend using the Smart Pro garage door opener as our Designer Series doors are often heavy and need the additional strength and lifting power that the Smart Pro provides. How long does a garage door opener last? B&D; have a 7-year warranty or 20,000 lift and lower cycles (that's roughly seven to eight cycles a day) on all of our garage door openers, except when purchased with a genuine B&D; garage door, at which point we offer our market-leading 10-year total confidence warranty . My opener is running but door isn't moving? Your garage door opener is probably disconnected from your garage door. Follow the below video to reengage your garage door opener. If this doesn't work call B&D; and we can arrange for one of our friendly, qualified garage door technician to service and repair your opener. Reconnect a roller garage door Reconnect a sectional garage door Why won't my garage door open when I press the button? The most common reason a garage door remote or wall button stops working is because the batteries are low. Change the batteries and try again. If this doesn't work watch our quick video tutorial below. If you're still having trouble call B&D; and we can arrange for one of our friendly, qualified garage door technician to service and repair your opener. Should I service my garage door opener? B&D; recommends servicing your garage door and opener once in the first 12 months and every two years thereafter. Just like the engine in your car, your garage door opener is made up of a lot of moving parts and needs regular servicing to keep it in tip-top condition. Book a service or call us on 13 62 63 and our friendly team can book one in for you. Can I add a new B&D; opener to a different brand of garage door? No. B&D; garage doors and openers are designed and tested to be used together which is why we recommend that you install your new B&D; opener on a genuine B&D; garage door. Can I install a smart garage door opener myself, or do I need to hire a professional? B&D; always recommend paying a professional for garage door and opener installation. Garage doors are heavy and when mishandled can seriously damage property or injure those close by. To read more on this check out our article on DIY vs. professional installation . What safety and security considerations should I keep in mind when integrating smart home technology with my garage door opener? When integrating smart home technology with garage door openers, it's important to ensure that your smart garage door opener uses advanced encryption technology, follow best practices for password security, and regularly maintain and inspect your smart garage door opener for safety and security issues. What is the automatic closing feature of garage door openers? The automatic closing feature of garage door openers allows you to set a timer for your garage door to automatically close after a certain amount of time, ensuring that your garage door is always closed and secure. What is rolling code technology, and why is it important for garage door openers? Rolling code technology is a security feature that changes the access code for your garage door opener every time you use it, preventing unauthorized access and reducing the risk of break-ins. How can garage door openers improve my home security? All B&D; openers have standard security features built in like Automatic Reverse and Automatic Backdrive. Automatic Reverse prevents the door from closing on any obstruction; as soon as the closing door encounters an obstacle in its path, the opener will immediately stop and reverse. Automatic Backdrive is designed to further prevent forced entry, with the opener driving back down if the door is being forced open. Automatic openers also remove the need for a fixed lock and handle, which is a common target among thieves. To level up your garage security again install a B&D; AUTO LOCK [™] on your garage door.
