No problem! In the event of a power outage, the last thing you need to worry about is being locked out of your own garage. In fact, accessing your garage may be critical to keeping your family safe. Battery Backup works when you need it to. During, emergencies like flood or fire, or during scheduled and unplanned outages, you can always rely on Battery Backup. By installing a B&D; Battery Backup, you'll maintain full function of your garage door should the power go out, which means you can rely on your door to still provide security and automation without the need for electricity. Read more about battery backup Read more about battery backup Read more about battery backup Smart door solutions Smart phone control An open garage is an open invitation for unwanted entry so it pays to know that you can control your door while you are away from home. Smart Door Solutions allow you to monitor and control your garage door while at work or even on holidays; all from your compatible smart phone. Best of all, smart door solutions are available for all door types, sectional, roller and designer. AUTO LOCK™ Safety & security upgrades Your garage door is the largest door in your home and plays an important role in protecting what's most precious to you. Whether it's cars, bikes, gym equipment or home office supplies, garages contain high-value items, making them appealing targets for intruders. You might think your garage is secure, but most garage doors don't actually lock when closed, which is an open invitation for troublesome thieves. Level up your garage door security with AUTO LOCK™; B&D's advanced automatic locking bolt specially designed to keep your home safe. Safety Beams Safety & security upgrades A garage door is the largest, heaviest moving part of a home, so consider the risks if it were to close on a family member, pet, car or bike. While all B&D automatic garage door motors feature built-in auto-reverse functionality to stop the door from colliding with an object, Safety Beams are specially designed to prevent potential injury to people or damage to valuables. Doors that don't just close – they lock shut! A common mistake made by homeowners when choosing a garage door is to believe that when the door is closed it is actually locked. Like your front door, there are multiple ways to lock your garage door to protect the things in your garage and often by extension your home. While a standard garage door with opener might not open easily, a determined intruder can gain access via a garage door that is not properly secured. That's why B&D invented the AUTO LOCK™. Recognising this weakness in home security, our R&D team developed the AUTO LOCK™: a keyless, heavy-duty locking bolt that is engaged automatically every time you close the garage door, preventing the door from being forced open. And while it must be paired with a compatible B&D Opener, it can be installed with almost any existing B&D garage door, making your home as safe as can B&D. [AUTO LOCK™](#) [AUTO LOCK™](#) [AUTO LOCK™](#)

Smartphone control from anywhere in the world Smart Phone Control makes it easy to open and close your garage door from anywhere – using nothing but your smartphone. It can also notify you whenever your garage door is operated or left open for an extended period of time, ensuring that your home is never left vulnerable to would-be thieves. [Smart Phone Control Kit](#) [Smart Phone Control Kit](#) [Smart Phone Control Kit](#)

Safety beams and safe openers All B&D openers have two key safety features built-in: Automatic Backdrive and Automatic Reverse. Automatic Backdrive, is designed to prevent forced entry, with the opener driving back down if the door is being forced open. Automatic Reverse is designed to protect your door and opener by preventing the door from closing on any obstruction. As soon as the closing door encounters an obstacle the opener will immediately stop and reverse. This built-in feature does work best when combined with our safety beams to stop and reverse the opener as soon as the infra-red beam is broken helping to protect pets and children.
