Our showroom can come to you

With B&D To You, you can explore door colours, materials and design options at home. A mobile-showroom consultation lets you consider samples alongside your façade and discuss the opening and the look you want. Ask us about availability in your area and the appointment arrangements.

Start with a free quote enquiry or call 13 62 63 . Our team will help you take the next step with your local provider.

Make the most of your conversation

For a new build: bring your plans, opening dimensions if available, exterior colours and any site requirements. Final measurements and installation requirements need to be confirmed before ordering.

For a replacement door: tell us what you would like to improve, such as appearance, access, security or everyday operation. Photographs of the existing door and opening can help start the discussion.

For an opener or upgrade: have the door and opener model available. Compatibility, mounting space and the condition of the existing door affect the right choice.

Before accepting a quote: confirm the model, profile, finish, controls, accessories, installation scope, removal of the old door and any exclusions with the dealer.

Need a service or repair?

Use our service enquiry for planned maintenance, or repair enquiry if something has changed or stopped working. For urgent help, see our emergency repair contacts . The provider confirms local coverage, attendance and charges.

If the door is damaged, crooked or has a broken spring or cable, stop using it and keep people clear. Arrange a trained technician rather than attempting to force or repair it.

Explore your options before you visit

Choose a garage door — compare door formats, space requirements and the features that matter to your home.

Plan your budget — understand the difference between door-only and complete installed pricing.

Try our Garage Door Visualiser — explore the look on your home, then check physical samples before selecting a finish.

Find an owner manual — choose the guide for the exact model and generation you own.

Let’s find the right next step

Tell us where you are and what you have in mind. We’ll help you connect with local advice for your B&D project.
